RAJ
PRODUCTS

**Manufacturer of Brass
Extrusion Rods, Ingots & Billets**

About Us

We introduce ourselves as leading manufacturer and exporter of Brass Extrusion Rods, having years of experience in this industry. We manufacture various types of Brass Extrusions, which includes Brass Rod, Ingots, Billets, Wires, Flats, etc., in different standards like IS, BS, DIN, ASTM, etc. These Free Cutting Rods find application in the manufacturing of various precision components.

We are dedicated to provide our customers a one-stop shop for brass alloy needs, including working with our clients to define specialty solutions that meet their individual needs. Since our establishment, quality has always been a most important aspect of our organization. We are continuously engaged in delivering our clients a flawless range of Industrial Metal Products.

Excellence

We always strive for excellence in every aspect of our business and manufacturing processes.

Cost Effective Price

We can provide you products at very cost effective rates and of best quality, We believe that price and quality are key to sales success.

On Time Delivery

Our continuous observation of our customer's demand and supply gap enable us to offer the right products on the right time.

Quality Products With High Efficiency

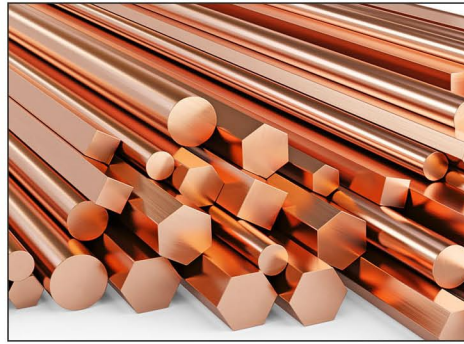

Quality control is implemented at every stage and for every process. This ensures that any problems or material damage are caught early and can be fixed or discarded before going through all the processes and wasting time and money. Systems and procedures are in place for every aspect of the day-to-day functions and processes at the Brass Extrusion Rods manufacturing plant.

With the use of advanced technology, our experienced and skilled employees produce the best quality alloys. Advanced quality control techniques are employed at every stage of manufacturing. Our commitment guarantees to provide our customers with uncompromising quality and service.

We are committed to provide the consistent Quality products to our customers as per their Quality Standards / Specifications and Schedules.

- Meeting Customers Quality Standards
- On Time Deliveries as per Customers time frame
- Efforts towards improvement of Quality & Productivity
- Safe Working Environment

Extrusion Rods & Bars

Raj Products produces Rods & Bars in solid forms and in various shapes like Round, Hollow, Hex and Squares which are available to suit a wide variety of engineering applications. We offer a variety of Dia, A/F, Thicknesses and Widths according to customer specific requirements. Our Rods and Bars size ranges from 1mm diameter to 200mm as per required material grade. All our products are compulsorily passed through spectrometer testing for alloy composition testing. Apart from the good machinability, corrosion resistance and higher strength properties, brass rods.

Ingots & Billets

We are manufacturer of high grade brass ingots with wide range of alloys and various international standards. All our ingots are alloy tested and certified. Ingots are mainly used in bearings, sleeves, pressure seal casting, valves, pumps, impellers and water supply industrial products. A billet is a length of metal that has a round or square cross-section, Billets are created directly via continuous casting. Billets are suitable for further processes via extrusion, rolling and drawing. Billets are also known as bar stock. Billets have a specific grain structure, which enables the metal to be processed more intricately.

Coils & Wires

We offer a variety of Extrusion Wire, Continuous Cast Wire, & Brass Flat Wire which are extensively used in automobile, electronic, electric & nipples. Our range of wire & coils mesh is acclaimed for its durability, excellent performance and minimal prices. Our installed machinery has a capacity to manufacture wires that can cater to the demands of a wide range of applications that include jewellery, fasteners, electronics and more.
